*For licenses in which OPLR did not have sample theory data to inform, theory hours were allotted as a function of practical hours: for every 1 practical hour, 0.7 hours of theory were given. Additionally, in the absence of sample theory data, OPLR assumed 60% overlap in the theory hours of endorsements within the same general license (e.g. hair design).

**The 'other hours' allotted was a function of the number of practical and theory hours. For endorsements, OPLR allotted 0.2 'other hours' for every 1 hour of practical and theory. For licenses, OPLR allotted 0.1 'other hours' for every 1 hour of practical and theory.
